Library of Congress Cataloging-in-Publication data:
Epstein, Joshua M., 1951–
Growing artificial societies : social science from the bottom up /
Joshua M. Epstein and Robert Axtell.
p. cm.
A monograph of the 2050 Project, a collaborative effort of the Brookings Institution, the Santa Fe Institute, and the World Resources Institute.
Includes bibliographical references and index.
ISBN 0-262-05053-6 (cloth). — ISBN 0-262-55025-3 (pbk.). — ISBN 0-262-55026-1 (CD-ROM)

Acknowledgments

For careful readings of the manuscript or portions thereof, for stimulating discussions, and for other contributions, we thank Henry Aaron, Philip Anderson, Brian Arthur, Jean-Pierre Aubin, Robert Axelrod, Mark Axtell, Robert Ayres, Steven Bankes, Aviv Bergman, Jill Bernstein, Bruce Blair, John Bonner, Steven Brams, David Campbell, John Casti, Nazli Choucri, Michael Cohen, Rob Coppock, Malcolm DeBevoise, Jeffrey Dean, Giovanni Dosi, George Downs, Samuel David Epstein, Hal Feiveson, Marcus Feldman, Duncan Foley, Walter Fontana, Cliff Gaddy, Murray Gell-Mann, David Golden, Valerie Gremillion, George Gumerman, Allen Hammond, John Hiles, John Holland, Bernardo Huberman, Yuri Kaniovski, Stuart Kauffman, Paul Kennedy, Alan Kirman, Ed Knapp, Chris Langton, Blake LeBaron, Axel Leijonhufvud, Rob Lempert, Simon Levin, Frank Levy, Robert Litan, Bobbi Low, Bruce MacLaury, Kati Mártinas, Gottfried Mayer-Kress, Jessica Tuchman Mathews, Geoff McNicoll, Greg McRae, John Miller, Cristopher Moore, Benoît Morel, M. Granger Morgan, Harold Morowitz, Bruce Murray, Kai Nagel, Tanvi Nagpal, Avidan Neumann, Scott Page, Alan Perelson, Robert Picard, David Pines, Steen Rasmussen, Dale Rothman, Thomas Schelling, Lee Segel, Elena Shewliakowa, Mike Simmons, Carl Simon, Herbert Simon, Robert Socolow, Paul Stares, Nick Vriend, Gérard Weisbuch, Arthur Wightman, Sidney Winter, and H. Peyton Young. For research assistance we thank Trisha Brandon, Alf Hutter, and Steven McCarroll. For administrative assistance we thank Ann Ziegler.

We are grateful to Robert Faherty for editing the manuscript. We thank Deborah Styles for editorial assistance, Julia Petrakis for indexing the book, and Natasha Hritzuk and Andrew Solomon for verifying the manuscript.

We are particularly indebted to John D. Steinbruner for his support, intellectual engagement, useful ideas, and wise counsel.

For their love and support we thank our families, especially our wives, Melissa and Roxanne, and our daughters, Anna Matilda and Emma.

We are very grateful to the John D. and Catherine T. MacArthur

Foundation for providing the grant that initiated the 2050 Project and to The Howard Gilman Foundation, Inc., for sustaining support. Funding for this book was provided by continuing grants from both foundations. Additional support for the project in its final stages was provided by The Pew Charitable Trusts. We acknowledge with great appreciation the interest and support of these foundations.

The views expressed in this book are those of the authors and should not be ascribed to the persons or organizations whose assistance is acknowledged or to the trustees, officers, or other staff members of the Brookings Institution or the other institutes that have collaborated in the 2050 Project.

Contents

I. Introduction 1

"Artificial Society" Models 2

Life and Death on the Sugarscape 6

Sex, Culture, and Conflict: The Emergence of History 8

Sugar and Spice: Trade Comes to the Sugarscape 10

Disease Agents 13

A Society Is Born 14

Artificial Societies versus Traditional Models 14

Artificial Societies versus ALife 17

Toward Generative Social Science: Can You Grow It? 19

II. Life and Death on the Sugarscape 21

In the Beginning . . . There Was Sugar 21

The Agents 23

Artificial Society on the Sugarscape 26

Wealth and Its Distribution in the Agent Population 32

Social Networks of Neighbors 37

Migration 42

Summary 51

III. Sex, Culture, and Conflict: The Emergence of History 54

Sexual Reproduction 55

Cultural Processes 71

Combat 82

The Proto-History 92

Copyrighted Material

Copyrighted Material

IV. Sugar and Spice:
Trade Comes to the Sugarscape 94

Spice: A Second Commodity 96
Trade Rules 101
Markets of Bilateral Traders 108
Emergent Economic Networks 130
Social Computation, Emergent Computation 133
Summary and Conclusions 136

V. Disease Processes 138

Models of Disease Transmission and Immune Response 138
Immune System Response 140
Disease Transmission 145
Digital Diseases on the Sugarscape 147
Disease Transmission Networks 150

VI. Conclusions 153

Summary 153
Some Extensions of the Current Model 162
Other Artificial Societies 165
Formal Analysis of Artificial Societies 176
Generative Social Science 177
Looking Ahead . . . 178

Appendixes

A. Software Engineering Aspects of Artificial Societies 179
B. Summary of Rule Notation 182
C. State-Dependence of the Welfare Function 186

Animation II-5. Evolution of Social Networks of Neighbors under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}\}$) 41
Animation II-6. Emergent Diagonal Waves of Migrators under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}\}$) from an Initial Distribution of Agents in a Block 43
Animation II-7. Migration and Hibernation Resulting from Rules ($\{\mathbf{S}_{1,8,50}\}$, $\{\mathbf{M}\}$) and a Random Initial Distribution of Agents 46
Animation II-8. Agent Migration in a Polluted Environment; Rule System ($\{\mathbf{G}_1, \mathbf{D}_1\}$, $\{\mathbf{M}, \mathbf{P}_{11}\}$) 49
Animation III-1. Age Histogram Evolution under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{S}\}$) 59
Animation III-2. Societal Evolution under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{S}\}$), Coloring by Agent Vision 60
Animation III-3. Societal Evolution under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{S}\}$), Coloring by Agent Metabolism 62
Animation III-4. Evolution of the Lorenz Curve and Gini Coefficient under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{S}, \mathbf{I}\}$) 69
Animation III-5. Evolution of Genealogical Networks under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{S}\}$) 70
Animation III-6. Tag-Flipping Dynamics under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{K}\}$) 75
Animation III-7. Tag Histogram Evolution under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{K}\}$) 76
Animation III-8. Evolution of a Network of Friends under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{K}\}$) 81
Animation III-9. Blue Takeover under Rule System ($\{\mathbf{G}_1\}$, $\{\mathbf{C}_2\}$) 84
Animation III-10. Red and Blue Coexistence under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{C}_2\}$) 85
Animation III-11. "Trench War" under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{C}_2, \mathbf{R}_{[60,100]}\}$) 87
Animation III-12. Colliding Waves under Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}\}$) 88
Animation III-13. Combat Eliminates Waves, Rule System ($\{\mathbf{G}_1\}$, $\{\mathbf{C}_2\}$) 89
Animation III-14. Combat and Cultural Transmission, Rule System ($\{\mathbf{G}_1\}$, $\{\mathbf{C}_2, \mathbf{K}\}$) 91
Animation III-15. A Realization of the Proto-History, Produced by Rules ($\{\mathbf{G}_1\}$, $\{\mathbf{M}, \mathbf{S}, \mathbf{K}\}$) 93

Animation IV-1. Elaborate Trajectory of an "Observational" Agent in the Case of Both Sugar and Spice Present under Rule System ($\{G_1\}$, {M}) 100
Animation IV-2. Evolution of Supply and Demand under Rule System ($\{G_1\}$, {M, T}) 115
Animation IV-3. Price and Price Range Time Series for Pollution Accompanying Sugar Extraction and Consumption: Rule System ($\{G_1, D_1\}$, {M, T, P}) 128
Animation IV-4. Emergent Trade Network under Rule System ($\{G_1\}$, {M, T}) 132
Animation IV-5. Emergent Credit Network under Rule System ($\{G_1\}$, $\{M, S, L_{10,10}\}$) 134
Animation V-1. Society Rids Itself of Disease under Rules ($\{G_2\}$, {M, E}) 148
Animation V-2. Society Unable to Rid Itself of Disease under Rules ($\{G_1\}$, {M, E}) 149
Animation V-3. Disease Transmission Network under Rules ($\{G_2\}$, {M, E}) 151
Animation VI-1. Evolution of an Artificial Society under Rules ($\{G_1\}$, $\{M, S, K, T, L_{10,10}, E\}$) 155
Animation VI-2. Population Extinction under Rules ($\{G_2\}$, {M, S}) 160
Animation VI-3. Near-Extinction Event Followed by Recovery to Long Waves under Rules ($\{G_1\}$, {M, S, T}) 161
Animation VI-4. Typical Evolution of the Schelling Model with Agents Demanding at Least 25 Percent of Like Neighbors . 167
Animation VI-5. Typical Evolution of the Schelling Model with Agents Demanding at Least 25 Percent of Like Neighbors and Maximum Lifetimes Uniformly Distributed between 80 and 100 168
Animation VI-6. Typical Evolution of the Schelling Model with Agents Demanding at Least 50 Percent of Like Neighbors and Maximum Lifetimes Uniformly Distributed between 80 and 100 169
Animation VI-7. Typical Evolution of the Schelling Model with Agent Demands for Like Neighbors Uniformly Distributed between 25 Percent and 50 Percent, and Maximum Lifetimes Uniformly Distributed between 80 and 100 171
Animation VI-8. Flocking on the Ring 173
Animation VI-9. Disaggregation to Groups 174

CD-ROM Edition

A CD-ROM edition of *Growing Artificial Societies* is available. It operates on both Macintosh and Windows platforms and contains the complete text as well as the animations, which can be viewed in their entirety.
